# Centris Email

## FIRST CLASS BUSINESS EMAIL SERVICE

Designed from the ground up and perfected over 20 years to be a complete, secure and ultra fast email service that's expertly managed and backed up with award-winning support for every user. It's our flagship mail service and unlike no other.

Centris is custom designed & engineered to be faster, more reliable, fully compliant, secure & customisable for each user, in all mail clients & on all devices. It's the only email service that can confidently guarantee not a single minute of downtime, ever.

### 100% Uptime

As a vital component to the fabric of your business, we understand that 100% reliable email is of the utmost importance. Our Centris mail team monitor and maintain our systems around the clock to ensure 100% uptime with at least n+1 redundancy built-in throughout.

### Super-secure

Fully secured end-to-end email hosting using TLS and SSL. Our mail system will always try the most secure route of delivering mail to the other ISPs so your email is fully encrypted from your desktop to the recipients.

### Spam and Virus Protected

We employ the most advanced spam handling available – fully customisable, self-learning and self-healing on a per-account basis. And the whole process takes less than a second.

### Unique Dual-Mirror Operation

Unlike any other mail system on the planet, we keep a live mirror of our entire mail system – in perfect sync – in a secure datacentre 200 miles from our primary datacentre. So if there is a problem, the mirror takes over seamlessly.

### Migration is easy

If you're moving from an existing mail service, we'll ensure your emails are transfered too - with just a few simple config changes required when you switch. Mail, folders and passwords are all preserved thanks to our unique migration engine.

- 100% uptime guaranteed
- Mirrored Mail cluster
- 10GB Email Boxes as standard, upgradeable to 100GB
- SSL Secured End-To-End
- Migration Engine and assistance
- No send size limits
- Fully customisable, per-user spam protection
- Virus filtering as standard
- Compliant - IMAP and POP works with any email client
- Monitored and Managed 24/7
- Calendar support (iCal/CalDav)
- Keeps Mail in sync with all mail devices
- Award-Winning support for each user
- Feature-rich Webmail

## COMPATIBLE ON ALL PLATFORMS

Android    Mac and iPhone    Linux    Windows

## COMPATIBLE IN ALL BROWSERS

Safari    Firefox    Chrome    Explorer

# THE ONLY EMAIL SERVICE TO GUARANTEE 100% UPTIME.

Our 100% uptime guarantee is a big deal, a big ask and something no other email service promises, yet alone delivers. But Centris isn't your regular email service. It's the result of over 20 years creating the perfect email system with the primary goal of working around the clock, 24 hours a day, 365 days a year. We do this with our own custom cluster of the latest and most advanced servers all working together with failover built in. And uniquely, we mirror all of that into our secondary datacentre live. So every single transaction is mirrored onto both primary and secondary clusters. This allows us to be confident in providing the most reliable mail service on the planet. Multiple webmail servers, multiple incoming mail exchanges, multiple virus/spam filter servers and the latest redundant storage arrays - all working in perfect synchrony to deliver rock solid reliability, speed and security.

**Internet**

**SMTP Servers**

**Incoming Mail**

**Mail Exchange Servers (MX's)**

**Main Server**

**Spam/Virus Filters**

**Outgoing Mail**

**Webmail Servers**

**End User**

**Shadow/Backup Cluster**

\* Security of incoming mail depends on the sending mail server. By default, Centris servers will negotiate the most secure communication protocol supported.

## MacAce thinks different...

We're a UK Mac-specialist internet service and telecommunications provider with a world class network and a team of fanatical Apple and Internet professionals on hand to help - including our own systems team and developers. We believe in our services and back them up with around-the-clock support and a money-back guarantee.

Just like Apple themselves, we try to innovate. And just like their products, we aim to offer high quality user-friendly services to all Mac-based businesses - included amongst our fans are some of the largest companies in the world... When we design a product or service, we too are certainly not afraid to think different.

Our super-fast, super efficient webmail works on all platforms and has some innovative features like subject amendments, annotating, email box sharing features, re-scheduling, task managers, multiple accounts in one login, custom spam handling and so much more. Constantly evolving with new features regularly.
